

KUNDA SADAM

QUALITY, ENVIRONMENTAL AND HEALTH & SAFETY POLICY

We promote the following principles in our activities:

Personal approach

- We are able to react swiftly to the requests of our customers.
- We are flexible in our activities and proceed from the expectations of our customers.

Speed

- Our professional team is able to provide fast handling of goods.
- Technological descriptions provided for our work processes ensure sustained quality and safety.

Compliance with law

- Our activities are guided by local and international legislation.
- We regularly review obligations arising from legislation and update our management system accordingly.

Environmental friendliness

- We monitor the purity levels of the aquatic environment on a regular basis.
- We avoid possible pollution with bulk substances when handling goods.
- We ensure that waste is properly handled and immediately eliminate any contamination.

Secure and safe working environment

- We ensure a safe working environment for our employees.
- We involve our employees in assessing risks and inspecting the working environment.
- We make sure our partners and visitors comply with security requirements and requirements of occupational health & safety on the territory of the port.

(Excerpt from the management system manual)
